# Regulatory Tracking Summary

---

*2 December 2011*

This report summarizes regulatory items reviewed by the NASA RRAC PC. Items that appeared to have limited interest to the NASA community, or are provided for information only, are shown in light gray text. Notes and comments by the RRAC PC are shown in bold, blue text under "Description." Related documents and citations, such as "76 FR 51967," are linked to the appropriate document for quick access. Suggested follow-up actions are noted with significant items; users are advised that other follow-up actions may be appropriate for their program or facility. Previous issues of this regulatory summary are archived on the RRAC PC website at <http://www.nasa.gov/offices/rrac/home/>. Comments, questions, suggestions, and requests for further information should be directed to the RRAC PC Manager, Sharon Scroggins at 256-544-7932 ([sharon.scroggins@nasa.gov](mailto:sharon.scroggins@nasa.gov)).

## 1.2 Other News and Developments

### 1.2.1 Energy Efficiency Policy Calculator

On 22 November 2011, the [American Council for an Energy-Efficient Economy](#) (ACEEE) released a tool that enables users to analyze policy impacts on local energy savings, cost savings, pollution, jobs, and other outcomes over a specified time period. The Local Energy Efficiency Policy Calculator (LEEP-C) can analyze the impacts of seven policy types from two economic sectors—existing public buildings and existing residential buildings. To generate the analysis, LEEP-C uses existing costs and savings data from specific policies and user inputs regarding local energy, economic characteristics, and level of investment. LEEP-C, Version 1.0, BETA is available for download on the ACEEE [website](#).

### 1.2.2 Updated Progress on Declassifying Chemical Identities

On 28 November 2011, EPA announced its progress in reviewing data submitted as confidential under TSCA to evaluate whether it was appropriate to deny the confidentiality claim and release that data to the public. According to EPA, 577 formerly confidential chemical identities and more than 1,000 health and safety studies have been made available to the public.

The newly available information can be found under a new "declassified tab" using the [Chemical Data Access Tool](#) (CDAT). CDAT allows users to search databases containing health and safety information submitted under TSCA. Documentation of progress regarding the declassification of CBI files and access to CDAT is posted on the EPA [website](#).

### 1.2.3 Reconsidered Standards for Boilers and Certain Solid Waste Incinerators

On 02 December 2011, EPA signed a proposed rule that would amend HAP standards for boilers and solid waste incinerators. The proposed rule would change requirements for area source boilers, major source boilers and process heaters, and commercial and industrial solid waste incinerators (CISWIs), as noted in the following bullets:

- For area source boilers, the proposed changes would do the following:
  - Create additional subcategories.
  - Require initial compliance tune-ups after 2 years (instead of 1 year).
  - Require seasonal tune-ups every 5 years instead of every other year.
- For major source boilers, the proposed changes would accomplish the following:
  - Create additional subcategories.
  - Set new emission limits for particulate matter, dependent on subcategory.
  - Set new emission limits for carbon monoxide.
  - Allow alternative total selective metals emission limits to regulate metallic HAPs.
  - Replace numeric dioxin emissions limits with work practice standards.
  - Increase flexibility in compliance monitoring.
  - Revise emission limits for units located outside the continental U.S.
- For CISWI, the proposed changes would do the following:
  - Revise emission limits for dioxin and mercury.
  - Clarify definition of CISWI.
  - Increase flexibility of monitoring requirements.

EPA also is proposing revisions to the definition of “nonhazardous solid waste” to clarify which types of nonhazardous secondary materials can be burned in boilers or solid waste incinerators and which types of secondary materials are considered non-waste fuels. More information about the proposed standards for boilers and solid waste incinerators is posted on the EPA [website](#).

### 1.2.4 2013 Draft VGP Published for Comments

On 30 November 2011, EPA published a draft NPDES Vessel General Permit (VGP) and a draft Small Vessel General Permit (sVGP) that would authorize discharges incidental to the normal operation of non-military and non-recreational vessels. If finalized, the VGP and sVGP would replace the current VGP, which was issued in December 2008 and expires on 19 December 2013. Comments on the drafts will be accepted until 75 days after publication in the *Federal Register*.

The draft VGPs and more information regarding EPA’s program to regulate vessel discharges is provided on the EPA [website](#).

### 1.2.5 Green Products Compilation Updated

On 02 December 2011, the Green Products Compilation tool was updated to include additional biobased products from USDA’s BioPreferred Program, more water-efficient products from EPA’s WaterSense Program, and products listed in EPA’s Design for the Environment Program. The Green Products Compilation tool is series of spreadsheets listing products for which EPA, DOE, and USDA have provided environmental or energy attribute recommendations. Products are listed in 18 categories including office electronics; renewable energy; vehicle products; and lubricants, oils, hydraulic fluids and greases.

The updated tool, Green Products Compilation, Version 10, is available at the FedCenter [website](#).

### 1.2.6 Presidential Memo Directs Agencies to Implement Energy Conservation Measures

On 02 December 2011, a Presidential Memo, "Implementation of Energy Savings Projects and Performance-Based Contracting for Energy Savings," was issued instructing executive departments and agencies to evaluate their facilities, to identify potential savings, and to leverage funding to invest in comprehensive energy conservation projects. The memo urges agencies to implement and prioritize ECMs, to complete required energy and water evaluations, and to monitor and report energy usage data.

Specifically, the memo instructs agencies to do the following:

- Develop a schedule to implement ECMs and include the implementation schedule in the agency's Strategic Sustainability Performance Plan.
- Identify in the DOE's CTS any ECMs that have been implemented, and ensure that the CTS is regularly updated.
- Connect meters and advanced metering devices to enterprise energy management systems to streamline and optimize measurement, management, and reporting of facility energy use.

The memo is available on the White House [website](#).

### 1.3 NASA Regulatory Communication Working Group Updates

Regulatory Communication Working Group calls in 2012 will be held on the following Wednesdays at 10 a.m. CT:
